

COSTA RICA OUTWARD BOUND

Cuba Expedition

Enter the diversity of a country that has been closed off to US tourists for the past 50 years. The country is a melting pot of people, cultures and customs that reflect Caribbean, African and Spanish roots. The island also presents a rich array of natural wonders. Explore networks of caves that weave their way under the island's surface. Kayak out around small outer islands to see what treasures they hold and, after a full day of activities, rest up on a white, sandy beach under the shade of gently swaying palms. Other activities may include climbing and rappelling, snorkeling and hiking. Perform a service project before leaving that will allow you the opportunity to be actively involved in preserving the islands and the culture that depends upon them.
